

All Souls Chapel

Service and multimedia information

All Souls is an air-conditioned chapel that has seating for 80 people inside the chapel. There is also an undercover section outside that seats approximately 50 people who can view the service on two flat screen displays.

The chapel is accessible via the front stairs or along a ramp for those who require disability access. Concierge services are provided to assist funeral directors, event organisers and those attending services.

Media formats

The *All Souls* chapel has the capability to play all types of media, done in most formats.

Families are encouraged to make an appointment with our Chapel Concierge to test their presentation prior to the service. This ensures that any modifications can be made so that all media performs smoothly on the day of service.

The media playlist (along with clearly written instructions for when each item is to be played) must be given to the Chapel Concierge prior to the service.

It is preferred that all media is provided on a USB stick.

However, we are still capable of playing from most devices:

- DVD
- CD
- MP3
- MP4
- PowerPoint
- USB
- Windows Media Video

Recording of services

Services can currently be recorded upon request. We expect future capability will allow streaming of the service to a private channel on YouTube.

Live streaming

Live streaming is currently available.
